

Comma

Red Admiral

Ringlet

Speckled Wood

Large Skipper

White Plume Moth

Small White

Meadow Brown

Peacock

Cinnabar Moth

Download or print off this BUTTERFLY and MOTH spotter chart compiled by our CountrysideNK Ranger whilst out and about on the Stepping Out Footpath Network. See how many butterflies and moths you can spot during your own Stepping Out Walk. You may well see others so why not take a picture, say which walk you are on, send it to [admin@hillholtwood.com](mailto:admin@hillholtwood.com) and you could feature on our website!

The best place to spot butterflies is on large nectar rich bramble patches and along farmland field margins where tall grasses and wildflowers grow. You are more likely to see moths during an evening walk but the Cinnabar Moth is a brightly coloured red moth that flies during the day.
